

Recommendation

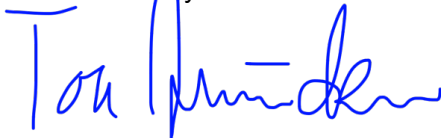

To whom it may concern

I would like to recommend Mr Mirosław Dąbrowski, as an experienced trainer and information security expert. He was responsible for conducting a five-day course on information security management in Oslo from February 15 to 19 this year. The aim of the course was to qualify as a lead implementer of ISO/IEC 27001. His training greatly helped me understanding recommendations and guidelines on how to implement Information Security Information System (ISMS) based on the ISO standard.

Mirosław has a vast background in implementing various management systems across multiple organization from different markets. During the training he generously shared his ISO implementation experience. Both his engagement, proactive approach, style of learning and practical experience as a Lead Implementer gave us great insights on how to approach ISO implementation.

I would certainly recommend Mr. Dąbrowski as an experienced trainer and ISO Implementer. He is an individual capable of transferring knowledge in a way that exceed my expectations.

Yours sincerely
